Purpose

This guide will outline how to create, correct, and close a deposit within RDN.

If you need additional help, please contact our Treasury Support Services Team at (800) 453-8700 option 2 or by email at treasurysupport@mercbank.com. Our Treasury Support Services Team is here to assist you during the business hours of 8:00 AM to 5:30 PM EST, Monday through Friday.

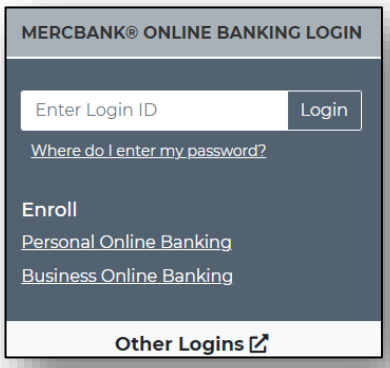
Overview

Completing a deposit in RDC is a three-step process:

1) Scan the checks into RDN.
2) Review and make corrections, if needed (e.g., MICR or Amount).
3) Send the deposit to the bank for processing.

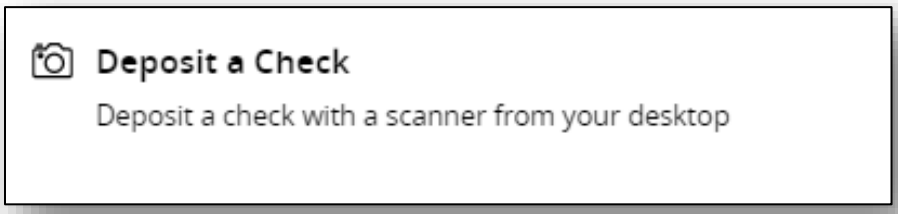
Step-by-Step

1) Go to https://www.MercBank.com and **Login**

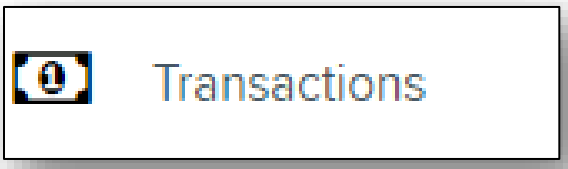


2) From the toolbar, **select Treasury**.

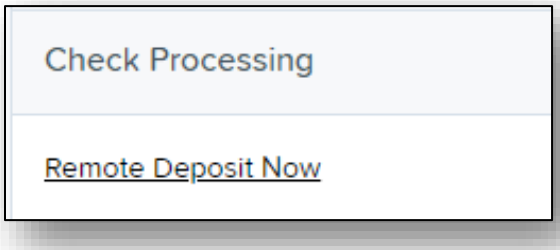
3) From the Treasury Services section, **select** the **Deposit a Check.**



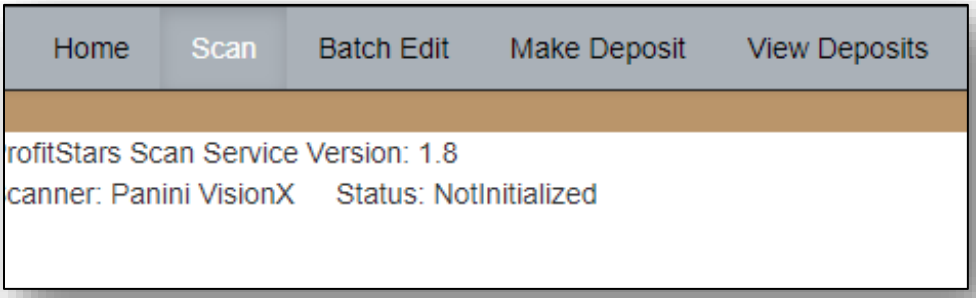
4) Once the portal has launched, **select Transactions**.



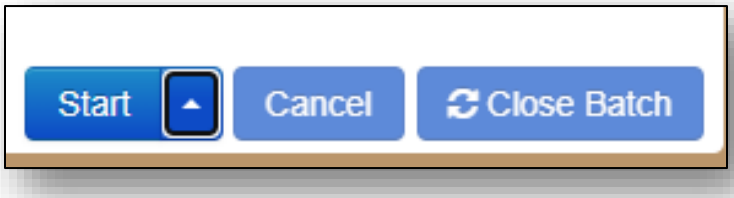
5) On the next screen, **select Remote Deposit Now** to launch the service.



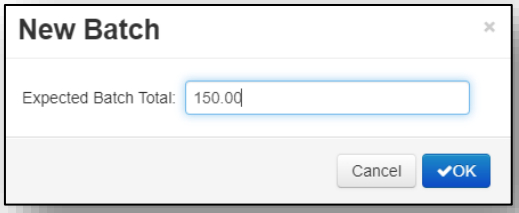
6) **Select Scan** from the toolbar at the top of the screen.



7) From the *Scan* screen **select Start** at the bottom right of the screen to continue.



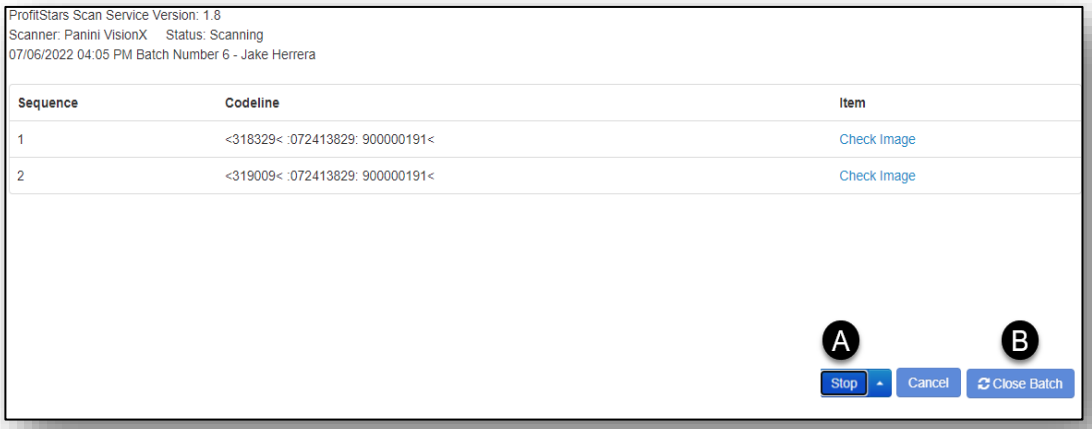
8) **Enter** the **total** amount **of all checks** in the deposit, then **select OK** to begin scanning checks.



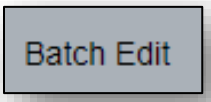
- Each scanner typically displays where and how the check should be inserted. Commonly, this is on the right-side facing out to the right, but others may require to feed a single check facing upward through the front with the MICR line facing the right.
- A virtual endorsement is set-up for each customer with the service, but you are welcome to add an endorsement indicating that the check is for electronic deposit only or similar restrictive endorsement.
- If you have a multi-feed scanner, it is recommended that larger checks go in the back and smaller ones to the front. Make sure that all checks are aligned. This can be accomplished by “jogging” or tapping the checks on a surface.
- Some multi-feed scanner models have a catch tray that extends for larger checks, make sure this feature is pulled out to avoid check jams.
- *Cannot* accept international checks.

9) As checks are scanned, the MICR details will display on the screen. Once scanning is finished, **select Stop** then **select Close Batch** to continue.

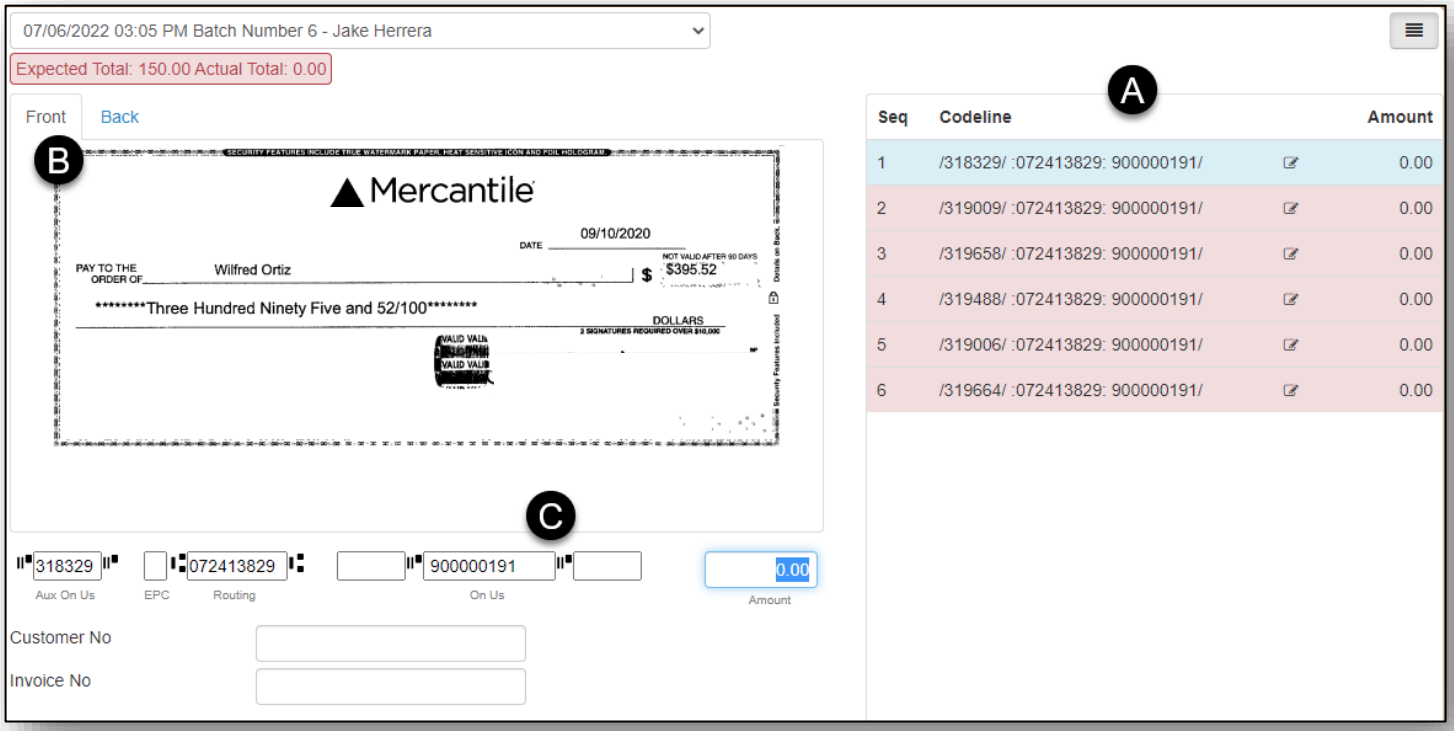
A. Stop scanning
B. Close batch



10) Next, **select Batch Edit** from the toolbar to review the checks and make corrections as needed.



11) From the *Batch Edit* screen, checks that need to be reviewed and corrected will display in red. As you review and make corrections, **select** the **Enter button** on the keyboard to advance to the next check to review.



A. **Item display -** Any items shown in red require review and correction.

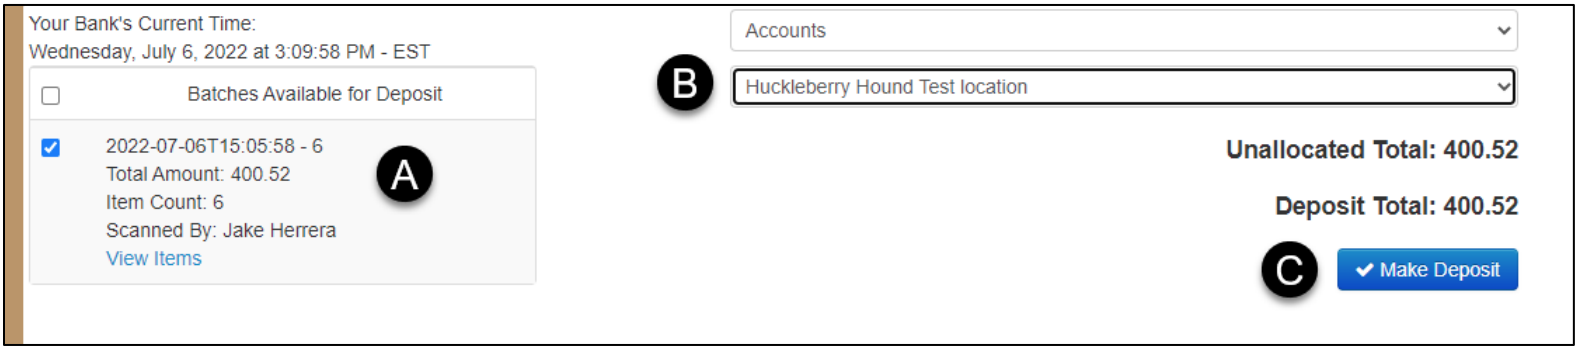
B. **Check Image -** The selected check will display for review.

C. **Field Correction -** Whatever field needs to be corrected will be highlighted in blue to key in the information (e.g. dollar amount or MICR details). If there is more than one issue, use the tab button on the keyboard to advance, or select the next field to correct. Once the correction has been made, select enter on the keyboard to move on to the next check to review and correct.

12) Once all items have been corrected, a message will display “All items needing editing have been completed”. **Select Save** to move on to the final step of the scanning process.

13) The final step in the process is to send the deposit to the bank. **Select Make Deposit** from the toolbar.

14) From the *Make Deposit* screen, **select** the **batch**, **deposit account**, and then **Make Deposit**.



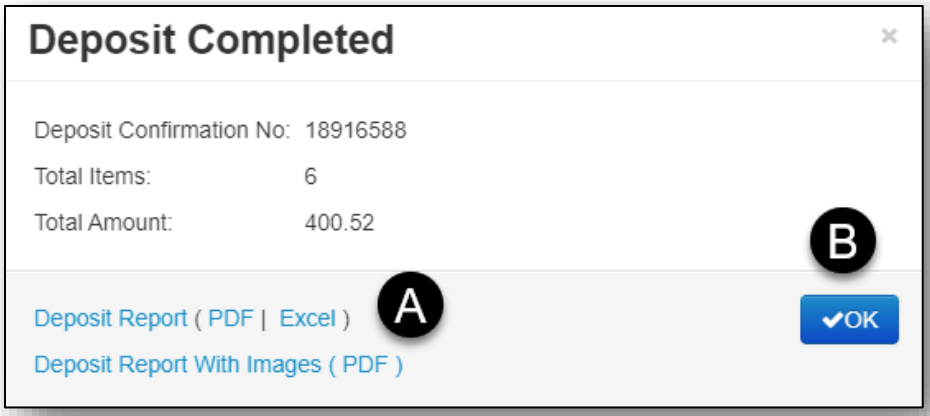
A. Batch selection

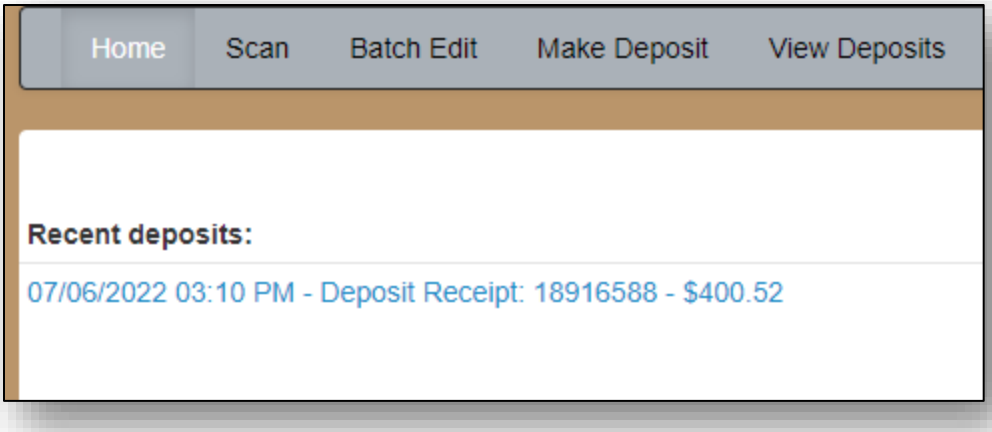
B. Deposit Account

C. Make Deposit- transmits file to bank for processing.

- **Note -** The cut-off time for deposits is 5pm ET. Deposits made by the cut-off will be credited to the account during overnight processing. Retain checks for 14 calendar days in a secure location. After that, they can be destroyed.

15) A Deposit Completed message will display. Choose one of the following options:



A. **Run a Report -** The *Deposit Report* will show the summary details of the check items and deposit. The *Deposit Report with Images*, will display the summary of all items and display the check images.
B. **OK -** Closes the display box.


The *Home* screen will display recent deposits.
